### **DETAILED ACTION**

1. This Office Action is the answer to the communication filed on September 20, 2010, which paper has been placed of record in the file.
2. Claims **1, 2, 4, 5, 8-12, 15-22, 25-29, 31, and 32** are pending in this application.

### ***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

#### ***Amending the claims 4 and 12 as the following:***

Claim 4, line 2, replacing "3" to "1";

Claim 12, line 1, replacing "7" to "5".

### ***Allowable Subject Matter/Reasons for Allowance***

4. Claims **1, 16, and 26** are allowed over the prior arts cited records.

The closest prior arts are:

1) Levine (US 6,233,566) discloses an online centralized financial products exchange system that creates a "marketplace" for end-to-end financial products life cycle transactions. More particularly, the invention provides a centralized exchange system for the trading of loans. The system includes a plurality of Web servers for

receiving and providing loan information from and to subscribers on several Web clients and a database server for searching the pre-set rules to match potential buyers with sellers. The system also includes a database for storing information relating to negotiations (i.e., bidding) for the sale of loans and for storing pre-set rules for pre-registered buyers and sellers. The system further includes a database and server for storing risk/return information that is made available to subscribers for analysis. Thus, Levine deals with an online centralized financial products exchange system for the trading of loans. In particular, Levine deals with a centralized marketplace for the trading of loan products and for end-to-end loan handling, i.e., over the lifetime of a loan. (Levine, column 5, lines 57-60.) In the system of Levine, a loan or pool of loans may be sold from a seller to a buyer. As described in Levine, a person wishing to sell a loan or loan pool may access system 200 via workstation 280d to publish a loan or loan pool for sale. However, in Levine, the loans are not prescreened to ensure that they meet at least one predetermined criteria, wherein the at least one predetermined criteria comprises that the securities are securities selected from the group consisting of venture-backed securities, private- equity-backed securities, and limited partnership interests. In particular, there is no disclosure or suggestion in Levine that the loans are prescreened to ensure that the loans are venture-backed, private equity backed, or limited partnership interests.

2) Shkedy (US 6,236,972) discloses a method and device for using a computer to facilitate a transaction of secondary market shares of an investment company such as a mutual fund between a buyer and a seller, having the steps of: a customer

determining the mutual fund to be traded receiving a schedule of fees from the central controller, the customer selecting the class of shares and inputting the quantity to be traded, the customer selecting the order type and adding any special instructions. The customer then submits the order to the central controller. The central controller will match buyers and sellers and determine which orders were executed. For all executions, the central controller will provide the seller with payments and the buyer with shares in the selected mutual fund.

3) Hambrecht (US 6,629,082) discloses an auction system that is used for pricing and allocating equity securities. Information about an offering to accept bids for equity shares is provided to qualified potential purchasers and non-qualified potential purchasers. Bids from potential purchasers for equity shares are received through a communication network. Bids are accepted and offered to be accepted only from qualified potential purchasers. A non-qualified potential purchaser submits a bid through a qualified potential purchaser. A clearing price for the offered shares is determined based on the received bids. Prospective investors who bid a price above the clearing price are allocated all of the shares for which they bid. Prospective investors who bid a price equal to the clearing price are allocated a pro-rata allocation of the shares for which they bid. No shares are allocated to prospective investors who bid a price below the clearing price.

Therefore, it is clear from the description of Levine's, Shkedy's and Hambrecht's inventions that the cited prior arts do not consider the possibility of: prescreening securities based on private equity to ensure that the securities meet at least one

predetermined criteria, wherein the at least one predetermined criteria comprises that the securities are securities selected from the group consisting of venture-backed securities, private-equity-backed securities, and limited partnership interests, as included in claims 1, 16, and 26.

5. Claims (2, 4, 5, 8-12, 15, 32), (17-22, 25), and (27-29, 31), are allowed because they are dependent claims of the allowable independent claims 1, 16 and 26 above, in that order.

#### **Conclusion**

6. Claims **1, 2, 4, 5, 8-12, 15-22, 25-29, 31, and 32** are allowed.
